UPDATE YOUR KNOWLEDGE! – QPCR COURSES 2014

TATAA Biocenter has been a real-time qPCR course provider for over 10 years and has trained thousands of satisfied researchers. We offer an extensive range of courses, both basic and advanced hands-on training, designed to ensure your competence is up to date within the area of qPCR.

DO YOU WANT TO GET STARTED AFTER SUMMER?

20% discount* on 2 days Hands-on qPCR, 1-2 September 2014 (Gothenburg)

*Use discount code Sep20X and register before August 29.

COURSE SCHEDULE 2014

IN CONJUNCTION WITH XXXIV NORDIC CONGRESS IN CLINICAL CHEMISTRY
15-16 SEPTEMBER, GOTHENBURG

1.5 days Genotyping with qPCR
An introduction to SNP analysis with focus on techniques using qPCR instruments. The course consists of a theoretical part and a practical part where participants get to do SNP analysis experiments under experienced supervision.

1.5 days Quality control of qPCR in mol. diagnostics
A theoretical course that will give you the tools to do proper quality control of your qPCR assays to be used in molecular diagnostics. You will gain knowledge of which controls that are needed, how the validation should be performed and the statistics for analysis.
Registration and read more

IN CONJUNCTION WITH QPCR & DIGITAL PCR CONGRESS
22-23 OCTOBER, LONDON

MIQE - How to get good quality control in qPCR

Are you working with qPCR? Do you have control of the quality in all the steps of the analysis procedure? This course will go deep into the MIQE guidelines, describe the important steps in RNA and DNA analysis with qPCR and how you should work to fulfill the guidelines.

Agenda – qPCR & Digital PCR Congress

GÖTEBORG, SWEDEN
15-16 SEPTEMBER, 2014
1.5 days Genotyping with qPCR
1.5 days Quality control of qPCR in mol. diagnostics
In conjunction with Nordic Congress in Clinical Chemistry
Registration

PRAGUE, CZECH REPUBLIC
22-26 SEPTEMBER, 2014
2 days Hands-on qPCR
1 day Sample preparation and quality control
2 days Experimental design and data analysis
Registration

6-10 OCTOBER, 2014
3 days Hands-on qPCR

20-24 OCTOBER, 2014 (CZECH LANGUAGE)
2 days Hands-on qPCR
2 days Single cell analysis
Registration

1 day Sample preparation and quality control
2 days Experimental design and data analysis
Registration

3-7 NOVEMBER, 2014
3 days Hands-on qPCR
NEW! 1 day Epigenetics: Applications and analysis
1 day Immuno-qPCR
Registration

24-28 NOVEMBER, 2014
3 days Hands-on qPCR
1 day Quality control of qPCR in molecular diagnostics
1 day Multiplex PCR
Registration

1-5 DECEMBER, 2014
3 days Hands-on qPCR
2 days Experimental design and data analysis
Registration
## OUR COURSE MODULES

<table>
<thead>
<tr>
<th>Hands-on qPCR</th>
<th>Experimental design and statistical data analysis for qPCR</th>
</tr>
</thead>
<tbody>
<tr>
<td>The basic real-time qPCR course. You will acquire a comprehensive overview of the possibilities with real-time PCR, how to use it and how to analyze the results.</td>
<td>Learn how appropriate statistics is selected and applied correctly to get the most out of your qPCR data.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Sample preparation and quality control of nucleic acids</th>
<th>Quality control of qPCR in molecular diagnostics</th>
</tr>
</thead>
<tbody>
<tr>
<td>Learn how to handle your samples, extract nucleic acids and check the quality to get the most powerful evidence from your experiment.</td>
<td>Learn how to do proper quality control of your qPCR assays to be used in molecular diagnostics.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Multiplex PCR</th>
<th>Epigenetics: Applications and analysis - NEW!</th>
</tr>
</thead>
<tbody>
<tr>
<td>Learn how to design assays to be able to run your reactions in multiplex.</td>
<td>An introduction to epigenetics and its applications and different analysis methods.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Single cell analysis</th>
<th>Immuno-qPCR</th>
</tr>
</thead>
<tbody>
<tr>
<td>Learn how to recognize the difference between cell population and single-cell analysis and how to interpret and apply single-cell data in biological studies.</td>
<td>Learn how real-time PCR can be used to quantify proteins.</td>
</tr>
</tbody>
</table>
COURSE TESTIMONIALS

“A great, well organized course that allows to gain plenty of important and useful information. I recommend it to everyone who wants to perform a study.”

“A requirement for anybody that wants to use the RT-qPCR in their work. All the important aspects of the method are covered and give a good solid starting point for your research.”

“Very informative lectures with hands-on experimental work topped off with really friendly help and discussions.”

“A thorough and simplified view of qPCR. Definitely an informative, inspiring and well-structured course.”

MEET US

16-19 September

XXXIV Nordic Congress in Clinical Chemistry
15-16 Sep: Pre-meeting Courses by TATAA Biocenter
Svenska Mässan, Gothenburg, Sweden

24-26 September

Genetická konference GSGM 2014
Průhonice, Czech Republic

25-26 September

EMBO Workshop: Unravelling Biological Secrets by Single-Cell Expression Profiling
EMBL Heidelberg, Germany

3 October

Bioteknikdagarna
Linköping University, Sweden

15-17 October

24th Annual Conference of the German Society for Cytometry (DGfZ)
Presentation by Prof. Mikael Kubista
Center of Regenerative Therapies, Dresden, Germany
