### 8.2 Exposure controls

*Appropriate engineering controls:*

Use only with adequate ventilation. If user operations generate dust, fumes, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

*Hygiene measures:*

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash

contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

*Respiratory protection:*

A respirator is not needed under normal and intended conditions of product use.

*Hands:*
