Norgen Biotek cf-DNA/cf-RNA BCT Tube is Best-In-Class

Scientists at the University Hospital of Heidelberg and the German Cancer Center carried out studies to test the limits of conventional EDTA tubes as well as long-term storage blood collection tubes (BCTs) from four different manufacturers. Norgen's tube was found to be one of the best at stabilizing cf-miRNAs, and it outperformed the other manufacturers in the amount of cfDNA isolated. The Norgen tube is unique in being compatible for the extraction of both cfDNA and cfRNA, and the size of the extracted cfDNA peaks exactly at 146 bp which is the length of true cfDNA.

Invitation to Norgen Webinar

Title: "Recent Advances in the Preservation and Purification of Plasma cf-DNA and cf- RNA"

Date: Wednesday, February 20, 2019

Time: 10:00 AM EST

Presented by: Dr. Moemen Abdalla

Offer Ending Soon!!

HAPPY
NEW YEAR
FROM TATAA!

Up to
50% Off
In Our New Year's Sale!

35% Off

TATAA ALU assays

- New & Exclusive!
- Ultrasensitive Detection and Semi-quantification of Human Genomic DNA
- Quality Control of Circulating Cell Free DNA

25% Off

4titude® Plates & Tubes

- Receive 25% Discount on 4titudes Top Quality Plates and Tubes with any TATAA Reagent Order.

25% Off

TATAA Q.C Products

- VisiBlue™
- BOXTO
- ValidPrime®
- RNA / DNA Spikes
- Reference Gene Panels
- TATAA Interplate Calibrator (IPC)

BONUS Offer!

50% Off ABM Vectors and Viruses in Celebration of their 15 Year Anniversary

TATAA Biocenter
helping you to a **QUALITY** start in
2019

*The offer is valid from now till Feb 28th 2019. Offers cannot be combined with other offers or discounts. Regional distribution rules apply.
Please contact us for more information OR order directly from TATAA Biocenter in our webshop or by e-mail to order@tataa.com.
