SEPTEMBER OFFERS*

> 10% off TriLink mRNA and oligos

Not valid on custom synthesis or bulk orders.

> 15% off TATAA Library Quantification Kit

Quantify any Illumina NGS library with our new qPCR kit.

NEW!

*The offer is valid until the end of September 2019, and cannot be combined with other offers or discounts.
Order directly from TATAA Biocenter in our webshop or by e-mail to order@tataa.com.

- TriLink offer open to Swedish customers only

Upcoming courses / events / webinars

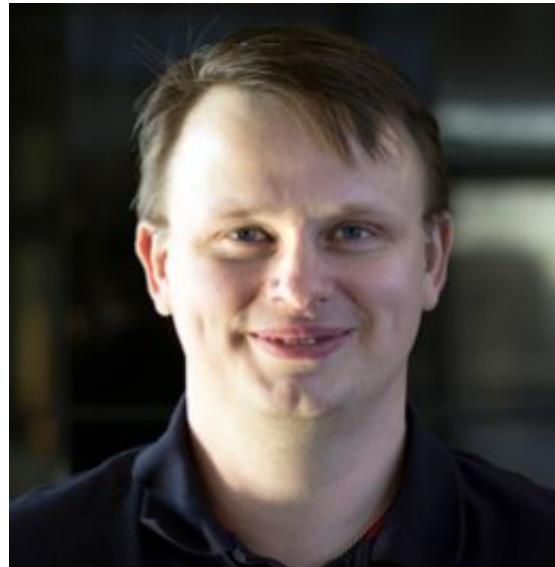

- **'Liquid biopsies' at EMBL, Heidelberg, Set 23-28**

Join Anders Ståhlberg at the TATAA sponsored course on “Liquid Biopsies” Sept 23-28 at EMBL, Heidelberg

Participants will learn about the complete workflow in liquid biopsies, from sample preparation to data analysis and gain an overview of the current methods. Best practices, pitfalls as well as dos and don'ts will be discussed. After the course, participants should be able to assess the best methods for their application as well as design their experiments.

For an impression of the course check the [2018 course programme](#).

- **'Molecular biomarkers, SNP genotyping and rare mutation detection in cancer' October 8-9 in Sparta, Greece**

Come and join TATAA's Mikael Kubista in Sparta, Greece 8-9th October for this course where he will present methods for nucleic acid analysis in cancer covering SNP genotyping, rare mutation analysis, methylation, copy number analysis, gene expression analysis, splice variants, microRNA and exosome analysis. The whole workflow from sampling, preanalytics, analytics and data analysis, and relevant guidelines are discussed. The course is lecture based.
