

## High-quality data takes you further

We offer products and services for your -omics workflows and provide expert support from sample extraction to final result.

- Expression profiling
- Single cell analysis
- Rare mutation detection
- Biomarker validation
- Metagenomics
- Epigenetic profiling
- Pathogen detection
- ...and more!

### Services

We offer a full range of services and research projects, custom designed for your needs within the area of nucleic acid extraction, qPCR, digitalPCR, NGS, and related technologies.

### Products

We develop high-quality products for qPCR and quality assessment. We also provide a carefully chosen selection of products within the area of NGS, sample preservation and purification, and more.

### Courses

We offer hands-on courses in qPCR and NGS world-wide, covering all aspects from basic introductory courses to advanced application based courses.
