## PRECISION DIAGNOSTICS EUROPE 2021

### DEADLINES

Abstract submission:	30. 4. 2021
Registration deadline:	15. 5. 2021

### The Precision Diagnostics Europe 2021

#### Virtual Conference

**26-28 May 2021**

Please join us at the The Precision Diagnostics Europe 2021 Virtual Conference

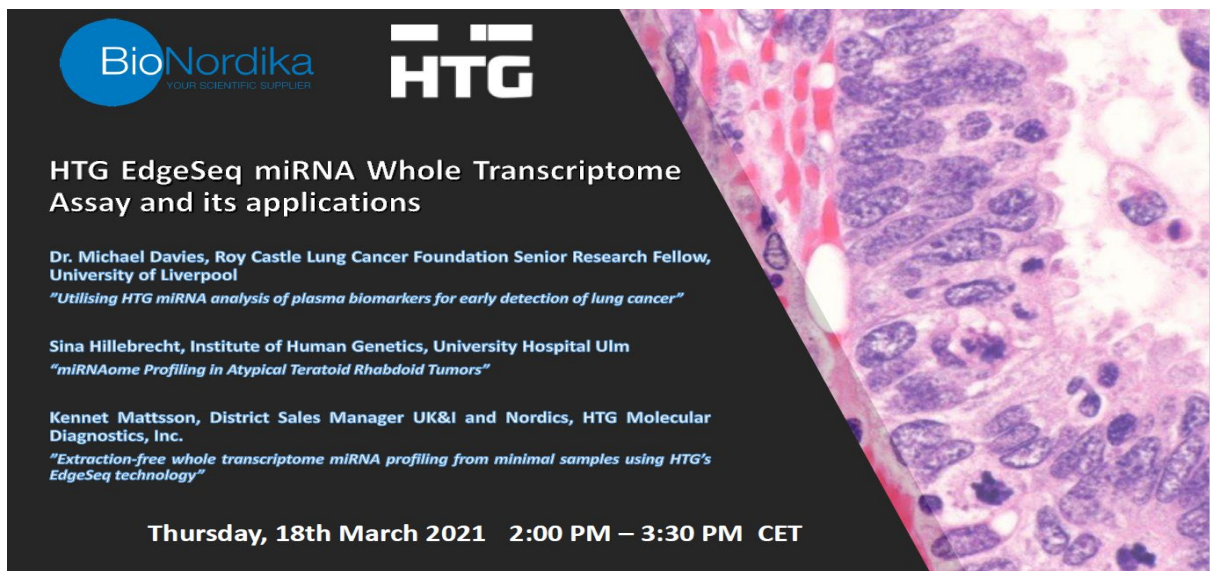

We're looking forward to the opportunity collaborate and share experiences virtually!

The topics of the Precision Diagnostics Europe 2021 conference are quality aspects of molecular analysis and diagnostics required for precision medicine and personalised therapies. More specifically, the focus is on the most recent molecular methods including liquid biopsies and single-cell profiling, discussing sensitivity, specificity and reproducibility aspects. The conference is arranged by [TATAA Biocenter](#) as the final meeting of the European Union financed project SPIDIA and SPIDIA4P ([spidia.eu](http://spidia.eu)). Joining in are experts in international standardisation for in-

vitro diagnostics from industry, public institutions and the European Standards Organisation, CEN.

You will hear presentations from world-leading experts in molecular analyses and biomarkers with a focus on precision diagnostics, quality aspects and regulatory guidelines.

[Online registration is now OPEN!](#)

**BioNordika**  
YOUR SCIENTIFIC SUPPLIER

**HTG**

**HTG EdgeSeq miRNA Whole Transcriptome Assay and its applications**

**Dr. Michael Davies, Roy Castle Lung Cancer Foundation Senior Research Fellow, University of Liverpool**  
*"Utilising HTG miRNA analysis of plasma biomarkers for early detection of lung cancer"*

**Sina Hillebrecht, Institute of Human Genetics, University Hospital Ulm**  
*"miRNAome Profiling in Atypical Teratoid Rhabdoid Tumors"*

**Kennet Mattsson, District Sales Manager UK&I and Nordics, HTG Molecular Diagnostics, Inc.**  
*"Extraction-free whole transcriptome miRNA profiling from minimal samples using HTG's EdgeSeq technology"*

**Thursday, 18th March 2021 2:00 PM – 3:30 PM CET**

## BioNordika & HTG Molecular webinar: miRNA whole transcriptome assay and applications

BioNordika and HTG Molecular would like to extend an invitation to a Webinar on the HTG EdgeSeq miRNA Whole Transcriptome Assay and its applications, on 18th March 2021 at 2:00 PM (CET)

You can register for the webinar [here!](#)

After registering, you will receive a confirmation email containing information about joining the webinar.

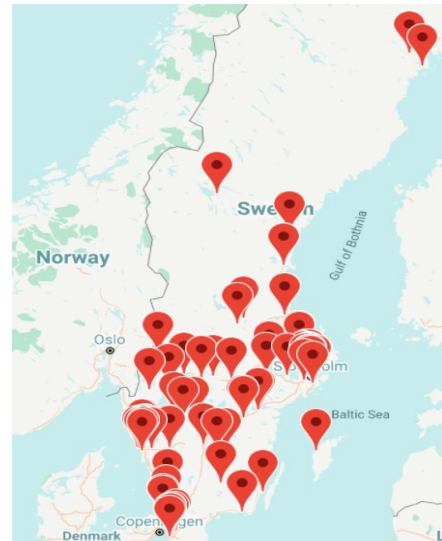

TATAA contributes to the review “[Ultrasensitive circulating tumor DNA analysis enables precision medicine: experimental workflow considerations](#)” in Expert Review of Molecular Diagnostics.

## Certificate of Health Before you Travel

Several countries have entry restrictions due to the current corona pandemic, which can include being tested negative for SARS-CoV-2 virus and certified with a medical certificate. We are an accredited laboratory that [reports to the Public Health Authority](#) and has been offering analyzes since [3rd February](#). Sampling takes place at cooperating clinics, which also issue certificates of negative tests.

Keep in mind that several countries and airlines have [face mask](#) requirements !
