**PRECISION
DIAGNOSTICS
EUROPE 2021**

The Precision Diagnostics Europe 2021
Virtual Conference
26-28 May 2021

Please join us virtually at the first European meeting on Precision Diagnostics!

For this conference, we have brought together several international key opinion leaders, all experts within their field of life science research.

As an attendee, you will partake in the latest findings in quality aspects of molecular analysis and diagnostics required for precision medicine and personalised therapies. You will also get full access and a first-row seat to all presentations as well as the opportunity to engage in live Q&A sessions and the chance to network with our experts and other attendees.

We will offer you inspiring presentations on for instance **precision oncology**, the most recent molecular methods such as **liquid biopsies**, the role of **biobanks** in the development of precision medicine and **pre-analytical requirements** and **regulatory guidelines**. To find the entire conference programme, please press [here](#).

This conference is arranged by [TATAA Biocenter](#) as the final meeting of the European Union financed project [SPIDIA4P](#). To find more information, either go directly to the [conference web page](#) or visit our [LinkedIn event](#).

- Speakers

- Anders Tegnell, Folkhälsomyndigheten
- Maria Jenmalm, Linköping University
- Purnika Damindi Ranasinghe, Queen's University, Belfast, UK

Health University Research Symposium (HURS) 2021, digital event on April 28th

The purpose of HURS is to bring forward the medical research conducted in Linköping, inspire PhD student to better research and at the same time create a platform for meetings between the industry, the students and the researchers.

Dr. Robert Sjöback, R&D Manager at TATAA, will share his expertise on how to standardize and validate sample collection and extraction. Join Robert's presentation at HURS at 11:45.

Project Manager

European Business Development Manager

TATAA Biocenter AB is a leader in Europe in RNA, DNA and protein analyzes with qPCR, NGS and microchip technologies. We offer global molecular education programs, accredited analytical services to industry and technical support to academic and state laboratories. We have developed several own products for qPCR analysis, especially in quality assurance, and supplemented with products from other suppliers. Today, we have one of the market's most complete range of qPCR and NGS products in Sweden with superior technical and application support. We are now looking to strengthen our team in a variety of areas and we look forward to your application.
